

FRANCISCO GOMEZ

Senior Software Engineer & Tech Lead | AWS Certified Solutions Architect – Associate

Barranquilla, Colombia (US time zones) · francisco.gomez2101@gmail.com · [linkedin.com/in/francisco-gomez2101/](https://www.linkedin.com/in/francisco-gomez2101/)

SUMMARY

Senior Software Engineer and Technical Lead with 16+ years building enterprise systems in Java. I design and deliver cloud-native Spring Boot microservices on AWS (ECS/Fargate, API Gateway, Lambda, SQS/SNS, RDS) and lead cross-functional teams of 4–6 engineers from requirements to production. Strong background in Oracle/PostgreSQL and in modernizing legacy SOAP/J2EE systems. Open to remote contract and full-time roles.

TECHNICAL SKILLS

- **AWS:** ECS, Fargate, ECR, EC2, Lambda, API Gateway, ELB, VPC, RDS, S3, CloudFront, SQS, SNS
- **Backend:** Java, Spring Boot, REST APIs, Microservices, SOAP / J2EE, Docker
- **Databases:** Oracle (PL/SQL), PostgreSQL, MySQL, SQL Server
- **Frontend & Mobile:** Angular, ReactJS, Android, iOS
- **Architecture & Delivery:** Solution architecture, UML, requirements & estimation, Agile/Scrum, Jira, Azure DevOps, GitLab

EXPERIENCE

Technical Lead

Mar 2022 – Present

Sophos Solutions · Colombia

- Lead cross-functional teams of 4–6 engineers (full-stack, backend and database) across design, development and delivery.
- Design and build Spring Boot microservices and REST APIs deployed on AWS ECS/Fargate with images in ECR, exposed through API Gateway and Elastic Load Balancing inside VPCs.
- Implement event-driven and serverless integrations with SQS, SNS and Lambda; persistence on RDS and storage/content delivery with S3 and CloudFront.
- Own solution architecture and technical decisions; drive requirements gathering and project estimation with business stakeholders.
- Mentor developers, run code and design reviews, and manage delivery in Azure DevOps.

Software Engineer / Technical Lead

Feb 2014 – Mar 2022

AMERIKA T.I. · Barranquilla, Colombia

- Led solution design and architecture and mentored development teams for the company's in-house products.
- Built Spring Boot microservices and REST APIs, and modernized legacy J2EE/SOAP and JSP/JSF applications.
- Developed web front-ends in Angular and ReactJS on Google Cloud Platform, plus native Android and iOS apps.
- Wrote stored procedures in Oracle and MySQL and maintained Oracle Forms & Reports applications.
- Produced technical and architecture documentation (UML); managed work in Jira and repositories in GitLab.

Software Developer / Development Engineer

Nov 2009 – Feb 2014

Hildebrando, Inassa, ASP Solutions · Colombia

- Built enterprise applications in Java J2SE/J2EE (SOAP, JSP/JSF) and .NET; stored procedures in Oracle, MySQL and SQL Server; Oracle Forms & Reports.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
